

**> CORPORATE OVERVIEW**

**Trust Digital is the leading enterprise mobility management platform provider for government organizations and Global 2000 companies. IT organizations rely on our platform to cost-effectively secure, rapidly deploy and centrally manage their smartphones. By implementing Trust Digital's policy-based solution, corporations eliminate the risks associated with accidental or malicious disclosure of data.**

The challenge of balancing end-user productivity gains against the risk associated with an enterprise's use of wireless PDAs and smartphones has become a top priority for CIOs, CSOs, and CXOs worldwide. Brand risk and regulations (including HIPAA, PIPEDA, GLBA, The Data Protection Act, SB1386, SOXA, etc.) mandating the protection of consumer and financial data demand smartphone security solutions.

To tackle this issue, Trust Digital's multi-disciplinary team of mobile computing, wireless networking, security and IT infrastructure management experts created the next-generation mobility management solution that provides a new level of simplicity, automation, and transparency.

**Making Enterprise Mobility Management Easy**

Trust Digital's Enterprise Mobility Management (EMM) platform delivers a standardized smartphone environment for enterprises: policy-based security enforces 7x24x365 data protection across all major device platforms (Apple iPhone™, Palm®, Pocket PC, Windows Mobile®, and Symbian) including the most extensive list of supported devices from leading manufacturers such as Motorola, Palm, Samsung, Audiovox/Siemens, Dell, HP, and more.

Trust Digital's easy-to-use web-based console centralizes management and automates enforcement of on-device security and network access. Our solution addresses the five elements central to maintaining a corporate mobile environment:

- Manage** — define and manage device security, network access policies, and applications
- Provision** — deploy and decommission smartphones
- Secure** — transparently secure devices, data, and network access
- Support** — minimize IT support costs and maximize user productivity
- Audit** — support enterprise IT and policy compliance reporting requirements

**Company**

The executive team leading Trust Digital consists of information and software development experts with over 50 years of combined experience. Trust Digital's investors include Avansis Ventures, Core Capital Partners, Fairhaven Capital, and Summerhill Venture Partners. The company's board of directors is comprised of industry luminaries including Tenable Security CSO Marcus Ranum, VeriSign CSO Ken Silva, and Vigil Security Founder Russell Housley.

Trust Digital enjoys strong partnerships with industry leaders such as Microsoft, Verizon Wireless, Palm, Symantec, Motorola, and GuardianEdge. Customers that rely on our enterprise mobility management platform include the U.S. Department of Veterans Affairs, U.S. Air Force, U.S. Marine Corps, Internal Revenue Service, Chevron Phillips, Federal Housing Finance Board, GMAC Residential Mortgage, Investors Title Company, Peoples National Bank, Providence Health, Tanner Health System, and Infinity Pharmaceuticals.
